Hi Miguel,

There is currently a pending PRIA action in house for new uses for 87895-2 and 87895-4. It would be good if we could see the labels you are working with.

Thanks.
Debra

Hello,

This label is nearing the stamping stage here, however, I have been informed that there may have been a pending action back in Feb. Where is this label currently now under RD's spectrum? Would we be able proceed with our approval on our end?
